LinkedIn: linkedin.com/in/mohamedanasmohaideen | **Portfolio:** mohamedanas-one.vercel.app

Professional Summary

Senior Software Engineer with **4 years of experience** building fintech and enterprise applications with **Java, Spring Boot and Microservices**. Currently building the in-house CRM and trading platform of a UAE-regulated brokerage, covering MT5 trading integration, KYC/AML onboarding, payments and two-factor authentication. Previously delivered prepaid card services for **HDFC Bank** and ISO 20022 payment messaging. Experienced with Kafka, PostgreSQL, Docker, Kubernetes (AKS) and CI/CD, from design to production support.

Technical Skills

- **Languages & Frameworks:** Java (8, 11, 17, 21), Spring Boot 3, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Spring Cloud (Gateway, Eureka, Config Server, OpenFeign), Apache Camel, J2EE, SQL, JavaScript, HTML, CSS
- **Architecture:** Microservices, Event-Driven Architecture, REST, SOAP, API Gateway, Service Discovery, OOP, SOLID, Design Patterns
- **Messaging & Data:** Apache Kafka, ActiveMQ, Redis, Elasticsearch, PostgreSQL, MySQL, MongoDB, Flyway
- **Security:** JWT, OAuth2, Role-Based Access Control (RBAC), Two-Factor Authentication (OTP, TOTP), Rate Limiting, OWASP Secure Coding
- **Cloud & DevOps:** Docker, Kubernetes (kubectl), Azure Kubernetes Service (AKS), GitHub Actions, Jenkins, Trivy, SonarQube
- **Fintech Domain:** MetaTrader 5 (MT5), KYC/AML (Sumsub), Payments, Prepaid Cards, ISO 20022, NPCI/IMPS, SEPA Instant, Maker-Checker Workflows
- **Testing, Tools & Process:** JUnit 5, Mockito, Postman, Swagger/OpenAPI, Maven, Gradle, Git, GitHub, GitLab, Jira, Agile (Scrum), SDLC, DevSecOps

Professional Experience

MENA Capital Financial Markets L.L.C S.O.C — Dubai, UAE

Senior Software Engineer — Feb 2026 – Present

In-house CRM, client portal and back-office platform for a regulated forex/CFD brokerage (live in production)

- Develop and maintain **15+ Spring Boot microservices** behind a Spring Cloud Gateway, with Eureka discovery, a central Config Server, OpenFeign and **Kafka** event streaming on PostgreSQL.
- Integrated the **MetaTrader 5 (MT5)** platform: trading account creation, group sync, and direct deposits, withdrawals and internal transfers with admin approval workflows.
- Built **KYC/AML onboarding** with Sumsub identity verification, automated risk scoring and a multi-stage Admin and Compliance (maker-checker) approval process.
- Implemented **two-factor authentication** (email OTP and authenticator app), trusted devices, OTP rate limiting, JWT sessions and role-based access for client and staff portals.
- Designed the REST APIs (Swagger/OpenAPI) behind the client and staff portals, and delivered regulatory and business reports (sales, turnover, transactions, client KYC) as Excel and PDF, emailed to management.
- Release services through **GitHub Actions CI/CD** (Docker builds, Trivy image scanning) across dev, UAT, staging and production on **Azure Kubernetes Service (AKS)**, and maintain them with kubectl (pod logs, rollouts, restarts, troubleshooting).

- Resolve production incidents (Kafka topic provisioning, service discovery outages, MT5 connectivity) and cover changes with JUnit and Mockito tests.

M2P Fintech Chennai, India
Java Consultant (Contract) Mar 2025 – Dec 2025
Client: HDFC Bank | Project: Prepaid Cards (Gift, GPR, GPR NCMC)

- Designed and enhanced **Spring Boot microservices** for HDFC Bank's prepaid card issuance, BIN management and customer onboarding.
- Implemented role-based access control with a **Maker, Checker and Super Checker** workflow for corporate and tenant configuration.
- Developed secure REST APIs with Spring Security and JWT for the end-to-end card lifecycle, on MySQL, PostgreSQL and MongoDB in high-volume card systems.
- Contributed to CI/CD pipelines with Jenkins and Kubernetes across UAT and production for a regulated banking client.

Yethi Consulting Services Chennai, India
Software Engineer Nov 2024 – Mar 2025
Product: TenjinPay, an in-house payment transaction simulator

- Developed a **payment transaction simulator** to validate online transaction flows for bank approvals and NPCI certification.
- Implemented **ISO 20022** payment messaging for NPCI, IMPS, FedNow, Fedwire, CBPR+ and SEPA Instant Payments, with message routing and orchestration in Apache Camel.
- Developed RESTful services with Java 21 and Spring Boot 3 to simulate real banking interactions.
- Integrated PostgreSQL, Redis, ActiveMQ and Elasticsearch for transaction processing and monitoring.

Spire Systems Chennai, India
Programmer Analyst Jan 2023 – Oct 2024
Product: In-house Logistics Management System

- Designed and developed shipment booking, tracking and reporting modules with **Spring Boot** and Hibernate, with REST APIs for the JSP/JavaScript front end.
- Optimized MySQL queries on large datasets, improving response times.
- Implemented authentication and role-based authorization with Spring Security, covered by JUnit and Mockito tests in an Agile team.

Education

Master of Business Administration (MBA), IT & Systems Management Jul 2023 – Jun 2025
Bharathidasan University (BDU), Tiruchirappalli, India

Bachelor of Arts (B.A.) 2020 – 2023
B.S. Abdur Rahman Crescent Institute of Science and Technology, Chennai, India | CGPA: 7.8

Certifications

Java Developer Professional Course, JSpiders Training & Development Center, Chennai Feb 2023
Core Java, J2EE, SQL, Web Technologies and Frameworks | Certificate No. YADJ-83-89
